

OneBox Unified Messaging System Administration

Description

This course is specifically designed to familiarise delegates with the Unified Messaging for Lotus Notes/Outlook programming principals of the OneBox system, enabling them to make changes to the system configuration as well as create/delete and customise mailboxes as required. This course will also enable delegates to change Main Company Announcements and Recordings, run System Reports and carry out Backups of the Voicemail system.

Prerequisites

- Familiar with the Windows Application system
- Good skill in computer literacy
- An active role in Telecoms

Users should understand the following features on their Company's Telephone System: Diversion, Diversion on No Reply, Diversion on Busy and Follow Me.

Training Technique

This training consists of explanations, demonstrations and practical exercises to ensure each delegate is confident and proficient in using all the functions that their new system has to offer.

Who Should Attend

This course has been designed for Telecoms Managers, Support Engineers, IT Personnel, Systems Administrators and other personnel expected to manage the OneBox System.
